## Professional Experience

**Apr 23 to Till Date with Tata Consultancy Services, Pune as Senior Software Engineer/Scrum Master**

### Project : My-Config

Description : The application was developed for ASML assembly line workers. The basic idea of application is the workers who are working on assembly line will feed their data of the product on which they are working into the software and based on requirements the configuration report will be generated and it will be made to the user for study and research analysis purpose. Also this software allows the worker to track their efficiency and give suggestions about the product on which they are working.

### Key Result Areas:

- I have worked as Scrum Master cum Business Analyst for this project.
- Led Scrum team for software enabling assembly line workers to generate configuration reports and track efficiency.
- Collaborated with cross-functional teams to gather and document business requirements for software projects.
- Worked closely with developers and QA during sprint cycles, ensuring feature alignment with business needs.
- Facilitated daily standups, sprint planning, and retrospectives for Agile PODs.
- Managed product backlog, refined user stories, and ensured sprint commitments.
- Prepared reports and dashboards using excel to track KPIs and metrics.
- I have Presented sprint reviews to stakeholders, gathering valuable feedback and addressed those changes in the application.

### **Project : Finance Data Lake**

Description : The application allows user to create your own, personalized dashboards based on your business and persona that manages to simplify mapping of complex hierarchies and data threading. Also we have multiple widgets to show financial data in graphics format. We can see the data in table formats, pie charts, line charts, walk charts. There is separate application called wrapper from we can access all finance data. We also have access page, and feedback creation page - using this all FDL members can raise access requests and create incidents

#### **Key Result Areas:**

- Worked on legacy project and maintained responsive web applications using Angular, HTML5, CSS3, and JavaScript, improving user experience and boosting customer engagement.
- I have worked on enhancements for Access GPAS Page which gives privileges and rights to users as per the customer requirements.
- Wrote modular, reusable, and maintainable code while adhering to best practices for clean code.
- Worked with website designers to translate mock-ups into fully functional web pages using Figma.
- Discussed issues and problems with QA engineers to troubleshoot and fix bugs and errors as per the user acceptance criteria.
- I have also written unit test cases to check code coverage.

**Mar 22 to Apr 23 with UST Global, Pune as UI Engineer**

### **Project : KIBO Software**

Description; Kibo Commerce is a composable digital commerce platform for retailers, manufacturers, distributors, and wholesalers who want to simplify the complexity in their businesses and deliver modern customer experiences. Companies like Zwilling, Ace Hardware, and Coastal Construction trust Kibo to bring simplicity and sophistication to commerce operations and exceed customer expectations

#### **Key Result Areas:**

- Worked on Engineering part of the application which includes Order Management, Subscription, and all Ecommerce related facilities.
- Software Development using Angular 9 and React JS on frontend side and Ms .NET on backend side.
- Analysis of client project, suggesting suitable solution for project, technical discussion with client and Demoing the feature developed to client every end of sprint.
- I was also responsible for doing local deployment of the application through Jenkins.
- I was also part of Training committee who conducted domain training of the application within the organization.

**Oct 19 to Mar 22 with DMI Innovations Pvt Ltd, Noida as Associate Software Engineer**

### **Project : General Motors Financial**

Description; General Motors Financial Company, Inc. is the financial service arm of General Motors. The company has operations in US, Canada & Europe. The company provides retail loan and lease programs through auto dealers for customers across the credit spectrum

#### **Key Result Areas:**

- Understanding and coordinating client's needs / enhancements, customization of product accordingly and working with technical team to provide solutions as per the delivery schedules.
- Supported frontend development using Angular, participated in sprint planning and demos.
- Reviewed peer code and contributed to continuous improvement processes

### **Project : Operational Excellence**

Description; OEE is an application which was created for Allison Transmission Inc in United States, which helps the workers to fill the daily data entry for a particular product on which they were working.

#### **Key Result Areas:**

- Cross functional training in organization. Utilize the synergies from various team to ensure the retention of knowledge.
- Software Development using Angular 9 on Frontend side and Ms .NET on Backend side.
- Preparation of high and low level design documents.
- Writing and implementing efficient code.

---
